Achievements/Tasks

This application tests knowledge in terms of driving in 3 languages and saves all data related to users to SQLite . In this application, I used repository patterns and dependency injections, which make readability easier for users and avoid dependency.

Achievements/Tasks

This application helps to share your skills with others and get feedbacks from others. I used MS SQL Server, Entity Framework, Microsoft Identity to make application better.

Achievements/Tasks

Marketplace application is in the progress. In this application I am using Entity Framework, PostgreSQL and Docker to make application more professional.

Achievements/Tasks

School Management System application is in the progress. In this application We are using Entity Framework, PostgreSQL, SignalR, RabbitMQ, MediatR, and Docker to make application more professional
